The estimated total cost is \$2.0 billion.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of an important regional partner that is a force for political stability, and economic progress in the Asia-Pacific region. It is vital to U.S. national interest to assist Indonesia in developing and maintaining a strong and effective self-defense capability.

The proposed sale of aircraft and support will enhance Indonesia's humanitarian and disaster relief capabilities and support amphibious operations. This sale will promote burden sharing and interoperability with U.S. Forces. Indonesia is not expected to have any difficulties absorbing these aircraft into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Bell Textron Inc., Amarillo, Texas and The Boeing Company, Ridley Park, Pennsylvania. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require travel by the U.S. Government personnel and contractor representatives to Indonesia on a temporary basis to provide program technical support and program management oversight.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

This notice of a potential sale is required by law and does not mean the sale has been concluded.
